Prada is a very-early, high-yielding table potato with light yellow flesh and very attractive bright yellow smooth skin. It forms 8-10 very uniform large tubers which ideally suit to fresh market and packing as well. Prada has medium dry matter content, thus in spite of early yield it suits for home frying. Prada has good drought tolerance, good resistances against potato wart disease, resistance against Ro 1 and Ro4, PVY as well and a partial resistance against Pallida 2.

Plant

Maturity	Very early
Plant type	Leaf type
Growth habit	Semi-upright
Color of flower	Light red-violet
Foliage development	Rapid
Number of tubers	Medium
Dormancy	Medium

Tuber characteristics

Tuber shape	Long oval, Oval
Flesh color	Light yellow
Eye depth	Shallow
Skin color	Yellow
Skin characteristic	Smooth

Resistances

Nematodes	Ro 1, Ro 4
Potato wart disease	Race 1
Leaf blight	Medium
Tuber blight	High
Common scab	High
Internal rust spot	High
Second growth	High
Silver scurf	High
Bruising	High
PVY	High

Yield and Quality

Market outlet	Ware, Early ware, Pre-packing, French fries
Yield	Very high
Share oversize	High
Share undersize	Low
Cooking type	Fairly firm cooking
After cooking discoloration	Very low
Dry matter content	Medium
